DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 21, 29, 30, 32, 33, and 35, drawn to antibodies against sequences comprising CLLS, classified in class 530, subclasses 388.1 and 389.1.
- II. Claims 21, 30, and 35, drawn to antibodies against sequences comprising WQALLS, classified in class 530, subclasses 388.1 and 389.1.
- III. Claims 21, 30, and 34, drawn to antibodies against sequences comprising QVVA, classified in class 530, subclasses 388.1 and 389.1.
- IV. Claims 21, 31, and 35, drawn to antibodies against sequences comprising GMWQLLS, classified in class 530, subclasses 388.1 and 389.1.

Claims 21 and 30 appear in more than one group because they encompasses more than one invention, and will be examined to the extent that they read on the elected invention.

Claim 35 link(s) inventions I, II, and IV. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claim 35. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory

Art Unit: 1646

double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The inventions are distinct, each from the other because of the following reasons:

The antibodies of Groups I-IV are different, each from the other, because they are generated against different peptides and thus are different molecules with different structural and functional characteristics.

Because these inventions are distinct for the reasons given above and the searches required for Groups I-IV are different, restriction for examination purposes as indicated is proper.
